

Customer Health & Retention Dashboard

Portfolio simulation · Customer Success Analytics

Portfolio status

All customer names and values are fictional; the model demonstrates analytical thinking.

Purpose

Combine product usage, engagement, support activity and customer sentiment to prioritise proactive customer-success work.

How I would act

- Healthy: maintain value, monitor and identify expansion opportunities
- Watch: investigate adoption or support patterns and intervene proactively
- At Risk: coordinate a recovery plan, understand root causes and establish next actions

Core metrics

- Product usage and feature adoption
- Customer engagement
- Support volume and recurring issues
- Customer sentiment
- Time to first value
- Renewal and expansion indicators
