

The Customer Experience

What our review of onboarding, customer feedback and the end-to-end journey found — and what we recommend.

12%

of registrants are active after 30 days

10,530

verified customers never funded their account

461+

feedback items in 2 months, in 4 unconnected channels

Presented to Mr. Chukwuemeka Eze, Managing Director, and the Board
Customer Experience team · Office of Mrs. Folake Adisa, Head of Customer Experience

Context

WHAT A NEW CUSTOMER EXPERIENCES TODAY

- 1 Hears from a fellow trader that the loan came quickly
- 2 Downloads Sunrise Pocket and verifies BVN
- 3 Takes a selfie, picks an account tier, accepts the terms
- ? **Then nothing: no confirmation, no next step, no one to ask. The account is never funded.**

Over 18 months, account opening moved from the banking hall — where staff guided customers — to an app where they are on their own.

42,600

registered on Sunrise Pocket last quarter

9,340

made a first deposit

5,120

still active after 30 days

Why it matters: every unfunded account is acquisition effort with no return — and every disappointed trader weakens the word of mouth that brings customers to us.

Onboarding Drop-Off

47%

of customers who accepted terms went on to deposit. **10,530 lost at the finish line**

11,350

lost at BVN / NIN verification — **the largest drop in absolute numbers**

12%

of registrants are active after 30 days — **88% never become active**

Customers get through verification, then stall before depositing — and today we do not find out why.

Need Analysis

FRICTION

Mr. Tunde Bakare

Generator spare-parts dealer

Lost his verification session midway and gave up rather than restart.

Root cause: No save or resume — any drop forces a full restart

FRICTION

Miss Chiamaka Nwosu

Fashion designer, Abeokuta

Confused by unfamiliar account tier names with no plain explanation.

Root cause: Tiers named from the bank's view, with no comparison

SILENCE

Alhaji Musa Suleiman

Grains trader

Never contacted after registering. Assumed his account had failed.

Root cause: No proactive contact — silence reads as failure

SILENCE

Mrs. Grace Effiong

Retired civil servant, Ibadan

Received no confirmation that her documents had even been received.

Root cause: No acknowledgement or status after submission

Screens: current-state flow as recreated in our prototype

Common thread: the flow assumes a perfect connection and perfect understanding — and has no human fallback when either fails.

Redesigned Onboarding Framework

LEAD FRICTION FIX

Save and resume verification

A dropped connection no longer means starting again.

For Tunde — and the 11,350 lost at verification

LEAD TRUST FIX

Confirm, update, and reach out within 24 hours

"Documents received", live status, and a call or SMS to anyone verified but unfunded.

For Grace and Musa — and the 47% first-deposit step

Agent-assisted onboarding stays available at branches for older customers who prefer to open accounts in person — a need captured only in branch notebooks today.

WHAT TO WATCH FOR

0:15	Create account — “Step 1 of 5”, a few minutes	Expectations set up front
0:22	Verify identity — “Save & Continue Later”	For Tunde: no more restarting
0:50	Selfie — “Identity check completed”	For Grace: every step confirmed
0:55	Choose account — Starter or Plus, in plain words	For Chiamaka: no jargon tiers
1:12	“You’re all set” — SMS confirmation + Fund My Account	For Musa and the 47% step
1:44	First deposit, then a first transfer	Guided to first value
2:05	“How can we help?” — talk to a human agent	Feeds our Voice of the Customer loop

Proposed Solutions

Verify Your Identity

Why do we need this?

Your BVN/NIN confirms your identity and is required by the CBN for all Nigerian bank accounts. It keeps your account safe.

BVN OR NIN

Enter your 11-digit number

DATE OF BIRTH

DD / MM / YYYY

PHONE NUMBER

+234 --

Continue

Save & Continue Later

Your progress is automatically saved.

1 FOR TUNDE

Save & continue later

Explains why BVN is needed; progress is saved automatically.

Choose Account Type

Pick the account that fits you best. You can upgrade later at any time.

Starter Account

Good for trying out Sunrise Pocket

₦50,000 daily limit

✓ No ID required beyond BVN

✓ Basic transfers & airtime

✓ Simple to open

Essential Account

Great for everyday banking

₦300,000 daily limit

✓ One valid ID required

✓ Transfers, bills & savings

✓ Full app access

Recommended

Full Access Account

For higher transaction needs

₦5,000,000 daily limit

✓ Full KYC — utility bill + ID

✓ All features unlocked

✓ Business-ready

2 FOR CHIAMAKA

Plain-language tiers

Starter, Essential, Full Access — with limits and a recommended tier.

4 FOR EMEKA

Transfer status + human help

Amount, reference, expected time and “Talk to an Agent”.

Success Metrics

1 First-deposit conversion

Terms accepted → funded. 47% today → 65%. Shows whether the friction and trust fixes work.

2 30-day activation

Funded → 2+ transactions. 55% today → 65%. Shows whether customers start using the account.

ALSO TRACKED

- Stalled registrations recovered
- Transfer-related care calls, first-contact resolution
- Time to first value — no baseline today

Today = last quarter’s funnel. Targets are proposed and will be validated with a pilot cohort. Both headline targets alone lift end-to-end conversion to about 20%; 25% also needs the save-and-resume fix at verification.

Voice of the Customer(VOC)

THE RISK OF TODAY’S APPROACH

- 

Our biggest loss is invisible
The 10,530 who never fund don’t call or review. They just leave.
- 

No owner, no action
Feedback sits in call logs and notebooks and never reaches leadership.
- 

Problems go public
Unresolved issues travel by word of mouth — our main growth channel.

Our finding: every signal we hold is reactive and free-text — and no one is responsible for consolidating it.

VOC Framework

OWNER
Head of CX

NEW SOLICITED SIGNAL
1-question survey after onboarding and after a failed transfer

CADENCE
Weekly triage · monthly report to MD

PLATFORM
Airtable pilot → HubSpot at scale

FIX FIRST

1 Failed and delayed transfers
112 calls
Customers’ money is held for hours — highest severity, and it strikes right after funding.

2 No human in the app
260 comments
Highest volume — and the same missing fallback sits behind all four onboarding failures.

Next in line: repeated logouts and re-verification (89 reviews), which disrupt both onboarding and everyday use.

HubSpot
TARGET STATE · ROUTE & OWN

Central customer record, auto-classification, routing to Payments, Engineering, Support or CX, and follow-up tasks.

Pilot on Airtable now at near-zero cost; move to HubSpot for automatic routing and ownership at scale, after a data-protection review.

Live Solutions

1 Customer taps “Talk to an Agent”

On the delayed-transfer screen

A web feedback form with the following fields: "Customer Name" (text input with "GIFT" entered), "Issue Category" (dropdown menu with "Transfer Delay" selected), "Journey Stage" (dropdown menu with "Ongoing Use" selected), "Customer Feedback" (text area with "My transfer has been pending for a long time, and the money has not reached the recipient. I'd like to know the status of the transaction and when it will be completed."), "Overall Experience" (star rating with 3 stars selected), and "Would you like us to contact you?" (dropdown menu with "Yes" selected). At the bottom left is a "Clear form" link, and at the bottom right is a "Submit" button.

2 Feedback form captures the issue

Category, journey stage, rating, call-back

High-severity VoC record logged: Transfer delay

Airtable Automations

<noreply+automations@airtableemail.com>

Unsubscribe

04:40 (5 hour to me)

Hello,

A new Voice of Customer record has been logged under the transfer delay theme and requires review.

Summary: Transfer Delay

Source: Social Media Comment

Date: 09/22/2026

Sentiment: Negative

This theme is flagged as high priority as it is one of the two issues with the highest mention volume and the most severe customer language across all feedback

3

Record lands in one Airtable table

Grouped under Transfer Delay, with severity

4

Owner is alerted

Automatic email on every high-severity record

WHAT THE PILOT PROVED

Form → table → alert → monthly summary ran end to end. The summary surfaced the same top two themes as our analysis.

WHAT WE ADJUSTED

Self-selected categories mis-tag: transfer delays were logged as “Onboarding”. Weekly human triage stays in the loop.

NOT YET VALIDATED

Testing with real customers, and real-time transfer-status data from Digital Products.

The Customer Journey Map

READ THE ROWS

Emotions
Hopeful → frustrated →
anxious → guarded

2 added stages
Consideration and
Activation

Moments of truth
Activation and First use

Our working journey board in Miro. Consideration details are our assumptions.

Moments Of Truth

1

MOMENT OF TRUTH

Activation — the first deposit

“Can I get started?”

82% → 47%

reach tier selection & terms

go on to fund

- Tunde lost his session and gave up
- Musa heard nothing and assumed failure
- Grace never got a “documents received”

2

MOMENT OF TRUTH

First use — the first transfer

“Can I trust you with my money?”

6 hrs → 112

transfer delay, no explanation

care calls on held transfers

- Emeka’s money was held with no in-app status
- Care gave a generic reply, no follow-up
- Customers ask for a human inside the app

What must change is not every delay — it is the silence around it.

Targeted Improvements

ONBOARDING → FIRST DEPOSIT

Guided route to first deposit

Resumable verification, plain-language tiers, and an SMS or in-app nudge if the account is not funded within 24 hours.

EMOTIONAL SHIFT

We measure it by: First-deposit conversion

FIRST USE

Real-time transfer status

Processing → Confirmed → Complete, with a reference, expected time and a “Talk to a person” route when it runs late.

EMOTIONAL SHIFT

We measure it by: Transfer-related care calls · first-contact resolution

Same principle at both moments: remove the silence, and the emotion changes — even when the process is slow.

The Connected experience

TRUST FALLS AT EVERY LINK

Emeka is Tunde at onboarding, one of our 112 callers, and the trader warning others to “be careful”. One relationship, failing at connected moments.

Root Cause

Our root-cause board in Miro. The 35-point drop is 82% at terms → 47% at first deposit.

The Head of CX role already exists — this gives it end-to-end ownership across onboarding, feedback and the journey. No new hire.

Recommendations

ACTION	PROBLEM ADDRESSED	CUSTOMER IMPACT	MEASURE
1 Proactive status communication SMS or push at every onboarding step and every transaction delay, with a reference and next-update time. Why #1: Cheapest and fastest — breaks the chain at its first link.	Silence after registration and during transfers (Musa, Grace, Emeka)	Customers always know what is happening	First-deposit conversion; transfer-related calls
2 Close the first-deposit leak Save and resume, plain-language tiers, 24-hour funding nudge, agent-assisted option. Why #2: Largest measurable leak; builds on the messaging in #1.	10,530 verified but unfunded; 11,350 lost at verification	Easier to finish, guided to first value	47% → 65% first deposit; 55% → 65% activation
3 One Voice of the Customer loop One log, severity triage, a named owner, in-app human access, monthly Board report. Why #3: Sustains #1 and #2 — catches the next failure early.	461+ feedback items in four unowned channels	Issues fixed in weeks; customers told what changed	Complaint recurrence; resolution time

FOUNDATION Give the Head of CX end-to-end ownership across onboarding, feedback and the journey. None of the three moves holds without one accountable owner.

Lesson Learnt

Informed

at every step of onboarding and every transfer

[Recommendation 1](#)

Guided

from sign-up to a funded, active account

[Recommendation 2](#)

Heard

in one place, with an owner and a response

[Recommendation 3](#)

OUR ASK Approve end-to-end CX ownership and a four-week pilot of recommendations 1–3, reported back to the Board with results.

Thank you · Questions and discussion

Tool Stack

Ten tools, one loop: design the fix, capture the feedback, route it to an owner.
