

Freshdesk Support System

Real project · Customer Support Operations

Project status

Real portfolio project based on my documented Freshdesk support-system work.

Challenge

Create a structured support environment for billing and technical enquiries while reducing avoidable manual work and improving visibility.

What I built

Ticket routing, urgent escalation alerts, pending-ticket follow-ups, automated closure rules, a searchable knowledge base, canned responses and reporting.

What this demonstrates

- Customer support workflow design
- Automation and escalation thinking
- Knowledge management and self-service
- Accurate customer documentation
- Service reporting and operational improvement
